193Q: Are there any material differences between Ultimate Season Pass and Ultimate Season Pass Premium? Purchasing either the Ultimate Season Pass or Ultimate Season Pass Premium. Are there any material differences between the two? Which one is the better choice? I will have a 720p HDR set of 4K UHD 60FPS TV. Will the Premium version include future content (premium movie, etc.), and will the Ultra HD format be available for both? A: From my understanding the Premium version has a more comprehensive movie offering (probably at no additional cost), but the base version is free and includes all the existing content. Also since the Premium version is in 4K it will probably require a 4K display. [Rapidly progressive glomerulonephritis, associated with the cirrhosis]. A case of cirrhosis presenting with rapidly progressive glomerulonephritis is reported. The onset was marked by progressive renal failure and, during the 4th week, serum creatinine, blood urea nitrogen, gamma-globulins, and antinuclear antibodies were increased. The glomerular pattern was suggestive of rapidly progressive glomerulonephritis. Renal biopsy revealed a diffuse and global collapse of the glomerular architecture, associated with an intense mesangial proliferative process. No vasculitis was observed. After three weeks of hemofiltration, the biologic data improved and in the 6th week the clinical picture was stabilized. In cirrhotic patients without a clear cause of hepatic dysfunction, an acute glomerulonephritis should be suspected. Renal biopsy is recommended.Q: java - How to convert Array to String I'm working with Java on Android. I'm trying to make a function that receives String[] in a string. This is the result of that function: [F, F, M, F] What I would like to do is that the function returns only the "F" and the "M" The code I'm working with: public String getString(String[] array) { String s = ""; for(int i = 0; i
